EDUCATION

LOVELY PROFESSIONAL UNIVERSITY

Bachelor of Technology

Major in Computer Science

Relevant Coursework: Database Management System, Software Engineering; Operating Systems; Algorithms; Networking

Phagwara, Punjab

Expected July 2026

WORK EXPERIENCE

PLACIFY TECHNOLOGIES (Remote)

Web Developer | React

May 2024 - July 2024

- Directed the development of an interactive dashboard displaying user statistics from recent quizzes.
- Implemented UPI integration through NPCI URI without an external payment gateway, reducing transaction time by 30% and improving user satisfaction.
- Authored and optimized quiz web pages, resulting in a 25% increase in user engagement and a 20% reduction in registration errors.
- Facilitated communication with cross-functional teams to ensure seamless quiz execution and unified user experience.

PROJECTS

QUIZ APP | REACTJS, NODEJS, JWT

May 2024

- Spearheaded the development of a full-stack quiz platform with React for user interface and Node.js for backend processing, resulting in a 30% increase in user retention and a 20% improvement in system stability.
- Designed and integrated RESTful APIs and ensured secure user authentication with JWT, managing 1,000+ API calls per day.
- Adapted through admin dashboards, real-time score tracking, and error handling, leading to a 25% increase in daily active users.

FACIAL RECOGNITION SYSTEM | PYTHON, OPENCV

May 2024

- Constructed a facial recognition system using Python and OpenCV, achieving an accuracy rate of 95% in showing faces from live video feeds.
- Leveraged Haar Cascade classifiers and deep learning models to cut false positive rates by 40%, enhancing the precision and reliability of the image processing system.

PUBG GAME PREDICTION | PYTHON, SCIKIT-LEARN

May 2023

- Reinforced a machine learning model with Python and scikit-learn, predicting PUBG game results using in-game features, leading to a 25% enhancement in gameplay strategy and competitive edge for users.
- Streamlined model accuracy through feature engineering techniques such as data cleaning, normalization, and managing missing values.
- Achieved 85% accuracy by tuning parameters and employing algorithms like Random Forest and Gradient Boosting.

HUMAN ACTIVITY RECOGNITION | PYTHON, PANDAS, MYSQL

May 2023

- Built a machine learning pipeline to classify activities using smartphone sensor data, achieving over 90% accuracy.
- Improved data quality by implementing noise filtering, feature extraction, and windowing techniques, enhancing algorithm accuracy by 40%.

ADDITIONAL

Technical Skills: C++, Python, JavaScript, HTML/CSS, SQL, APEX, SOQL, Lightning Web Component, Git, GitHub

Languages: Fluent in English, Hindi

Certifications & Training: Programming in Python (Coursera), Completed training in Data Science and Machine Learning from GeeksForGeeks, completed training in Full Stack Development with React & Node JS from GeeksForGeeks

Awards: National Cyber Olympiad Zonal Distinction 2019 (Zonal Ranking: 5th, International Ranking: 41st)
